CRITERION I – CURRICULAR ASPECTS

1.1 – Curriculum Planning and Implementation

1.1.1 – Institution has the mechanism for well planned curriculum delivery and documentation. Explain in 500 words

Our college is running B.A., B.Sc., and B.Com. programmes affiliated to Karnatak University, Dharwad. College adheres to curriculum designed by the university. University modifies and revises course curriculum through BoS after getting feedback from the various stakeholders from time to time. Before the commencement of semester, in coordination with IQAC, Principal invites all the teaching staff to discuss about the academic activities for the entire year. Every teaching staff is asked to prepare and submit conspectus of studies which reflects total number of classes taking into consideration the actual number of working days excluding holidays, topics of the syllabus, completion of portion of syllabus month wise. During the discussion, the Principal also collects information about the financial requirement for the purpose of enrichment of course curriculum through seminars, surveys, field trips, projects, etc. Based on this, budgetary allocations are made accordingly. Calendar of event is prepared based on the university calendar of the event. While preparing calendar of event, Principal seeks information from every department about various activities being planned to conduct for the academic year and financial requirement for the conduct of co-curricular and extracurricular activities. This process of documentation enabled the institution to prepare a calendar of the event taking into the consideration, exhaustive planning of curricular, cocurricular and extracurricular activities for the current academic year. Calendar of the event of the college is displayed on Notice Board and college website. At the beginning of the classes, orientation programme is conducted for freshers. Freshers are informed about the overall schedule of the year, facilities, provisions, etc. For the effective delivery of course curriculum, the college provides necessary provisions like; procurement of academic journals, installation of softwares, based on course curriculum, purchase of equipments, augmentation of learning resources, internet connectivity, etc. In case of shortage of classes due to unavoidable circumstances, to cover up the syllabus, every teacher is committed to engaging extra classes. For slow learners, remedial classes are conducted regularly. To enrich the course curriculum, some of the departments regularly conduct study tours, visit historical places, undertake micro-projects, Group Discussions, In-house seminars, etc. All these activities are properly planned by the respective department and execute according to the schedule. For the effective delivery of

course curriculum, the college regularly invites experts, academicians to deliver a special lectures based on syllabi and current trends. All these processes have aimed at getting the good academic sem end result.

CRITERION VI – GOVERNANCE, LEADERSHIP AND MANAGEMENT

6.1 – Institutional Vision and Leadership

6.1.1 – Mention two practices of decentralization and participative management during the last year (maximum 500 words)

The practice of decentralization and participative management is clearly reflected in the various activities of the college. For example the Admission Committee has the autonomy to select and reject incomplete forms who seek admission for B.A., B.Sc., and B.Com. This process reflected in gaining good number of inflows of students for the last two years i.e., gradually increasing. Admission Committee do counsel parents and students at the time of selecting a particular program. The committee enlightens them about the program outcome and scope after graduation. Based on the capabilities of the student, the admission committee counsels them to take and select a particular program and combination. Further, as and when any department wishes to conduct special lectures, choose study tours, field visit, etc., they are at the liberty to make their own decisions to enrich the course curriculum. Only in the case of the study tour, field visit, teachers can choose their desired places and can be implemented by getting the permission of the Principal. Participative Management: College has active IQAC cell. Library Committee, Discipline Committee, etc.,. During the annual sports meets of the college, teachers are allocated with different events and similarly, during conduct of seminars, conferences, workshops, all the staff members irrespective of inter departments gather collectively for the successful conduct of such event. This has imbibed the qualities of belongingness of the institution amongst every staff of the college. Further, the college has support service units like NCC, NSS, YRC, Career Guidance, and Placement Cell, Grievance Redressal Cell, etc., most of the teachers do take an active role in various extension activities. For example in the year 2017-18 and 2016-17 English, Physics Chemistry Departments, History, Geography Departments are conducted National Level two days workshop, seminars, etc. Collective effort of every staff of the college witnessed the grand success of the academic programs. With the collective effort of the college also conducted inter zonal cultural events for Haveri District degree colleges and also our college hosted inter zonal level science Drama in Kannada competition event for Haveri District in the year 2018-19.

7.2 – Best Practices

7.2.1 – Describe at least two institutional best practices

Medicinal plants have been used for healthcare right from the ancient period. Studies have been carried out globally to verify their efficacy and some of the findings have led to the production of plant-based medicines. Medicinal plants play major roles in disease prevention and their promotion strategies. The Department of Botany put conscious efforts to identify, recognize and position medicinal plants and implementation of these strategies. The study of medicinal plants is termed as pharmacognosy which is a branch of science concerned with history, collection, identification, selection, preservation, import and export of various plants that of drug yielding. Drug plants have their medicinal value due to the presence of a chemical substances (secondary metaboloids) that exert definite physiological influence on the human body most important of them are alcoholoids, Terpioniodes, Glycosoides, Tannins, Essential oil, Fatty oil, Gums

and rhysinesnmucilages. The Context: To enrich the course curriculum, B.Sc-V students have to study on medicinal and economically valuable plants and further, Department of Botany along with students conducted a survey in and around Ranebennur Taluka, to find out the people suffering from various diseases including cancer, paralysis, skin diseases, Diabetic, etc., villagers find difficult to purchase allopathic drugs as the cost is high. To help people who are suffering from various diseases, the Department of Botany initiated the cultivation of medicinal plants. The Practice: The college has various medicinal plants like Aloes: it is dried juice obtained from leaves of various species of aloes there are about 180 species of aloe belongs to family liliaceae. Uses: ointment of aloe gel for burns and skin irritation, as an ingredient of cosmetics, As Purgative *Tinospora cordifolia*: The plants are used Diabetic, upset stomach, Liver disease stomach ulcer, Fever, Antibiotic, Antiviral Prickly Chaff Flowers (*Achyranthes Aspera*): The decoction of leaves seeds, and roots are used in treatment of asthma and cough, Antimalaria, Assets in expelling gases. Coconut: Coconut Palm it is Tall unbranched tree, the whole plant roots by decoction bark made into ash. Uses: promote the flow of urine used in diseases of uterus used in sore throat used in general weakens *Mimosa pudica*: Sensitive plant grow in our garden and college campus parts used the whole plant uses liver diseases, dysentery and kidney problems for mouth and throat inflammation, skin diseases *Tulsi* and *Camkasturi*: part used roots leaves and seeds, It is used for bad cough, skin diseases (Ring worm) *Syzygium Cumini*: Part used bark and seeds, use for taking care of excess sugar in the blood very effective in case of diabetic. *Hibiscus rosaneases*: part used whole plant. Uses: cough cold *Eucalyptus globulus*: part used leaves treatment of Asthma, bronchitis, whiffing cough respiratory problems to wash Wound *Periwinkle*: part used roots and leaves flower, uses: Diabetic, Cancer treatment, Blood pressure. The department of Botany regularly monitors botanical garden along with science students. With the support of NSS, NCC, the Department of Botany popularise every year the availability of medicinal plants in our campus. Evidence of Success The Department of Botany educated about the prominence of medicinal plants. Most of the parents visited the college to get medicinal leaves and are guided them to process of usage of such medicinal leaves. Further, the same is also educated many people of neighboring villages. Our's is the only such botanical garden developed and maintained at college level in the entire vicinity of Ranebennur Taluka areas. Problem encountered and Resources Required Necessary financial support of provided by the Principal for the maintenance of botanical garden. Recharging of ground water level: Objective of the Practice: To reduce the water scarcity which is persistent in many areas of neighbouring villages. To implement ground water recharge programme on a large scale in an integrated manner To effectively implement conjunctive use of surface water and ground water. To promote efficient methods of water use in the stressed areas. To explore the potential for rainwater harvesting in the college campus for the conservation of water and recharge of ground water level. To formulate an action plan for creation, revival and regeneration of groundwater recharge as well as rainwater harvesting potential in and around the Ranebennur Taluka. 1. The Context: There was huge water scarcity due to the changes in the climatical conditions in and around the college campuses. The output of the survey made by college NSS, NCC, YRC along with senior staff found out that, there is dire need of conservation of Rain water. Due to the heavy humidity during summer season in this part of Ranebennur, ground water level gets down and getting water through borewell was challenging. To avoid water scarcity in the campus and also to help surrounding residents of the college to get water recharge through borewell, college, collectively decided to utilise the some portion of land to construct a big pond and channelise the rain water to accumulate and thereby conserved water can be helpful to recharge ground water level, recharging of bore well, etc. The same practice of the college is also educated to neighbouring villagers

from time to time. Evidence of Success: In the part of Ranebennur Taluka, this is one of the best practice and appreciated by public, villagers, public representatives, government officials. College also conducts regularly on Increase of Ground Water Level by implementation of rain water harvest mechanism. Due to the awareness programme by the college, it has helped many neighbouring villages to implement this scheme in their campus, which are evidential greatly. 1.Problem Encountered and Resources Required: In implementation of this particular practice by the college, college and management has equally encouraged and provided necessary financial support to construct ponds. Hence, there is no any financial constraint to implement.
